CAREER OBJECTIVE

Full Stack Developer with hands-on experience building and deploying real-world web applications featuring secure authentication, role-based access control, and payment integration. Focused on writing clean, scalable code and contributing effectively to production-ready systems within a collaborative team.

SKILLS

Languages: JavaScript, TypeScript

Frontend Development: React, Next.js, HTML, CSS, Tailwind CSS, Shadcn, Daisy UI

Backend Development: Node.js, Express.js

Database: MongoDB, Firebase

Tools & Platforms: Git, GitHub, Stripe, Postman, NextAuth, VS Code, Vercel, Netlify

Soft Skills: Hardworking, Quick Learner, Teamwork, Responsible, Flexible, Adaptable

PROJECTS

Badar Uddin Welfare (Full Stack Web App)

[Preview](#) | [Client Code](#)

A role-based donation management platform enabling donors, admins, and volunteers to manage funds, approvals, and activities efficiently.

- Designed secure JWT authentication with role-based dashboards for donor, admin, and volunteer access control.
- Developed end-to-end donation workflow including request submission, approval system, and fund tracking.
- Built dynamic and responsive UI with real-time fund allocation insights using Tailwind CSS.

Technology: React, Tailwind CSS, Node.js, Express.js, MongoDB, Firebase Authentication, JWT

MicroTask Platform

[Preview](#) | [Client Code](#)

A task marketplace platform where users can create, manage, and complete micro-tasks with secure payment integration.

- Integrated Stripe payment system with secure checkout flow using Firebase Auth and JWT.
- Implemented role-based dashboards for task creators and workers with real-time task status updates.
- Optimized database structure in MongoDB to efficiently manage task-user relationships and transactions.

Technology: React, Tailwind CSS, Node.js, Express.js, MongoDB, Firebase Authentication, Stripe API, JWT

Care.xyz (Service Booking Platform)

[Preview](#) | [Client Code](#)

A service booking platform for babysitting and elderly care, enabling users to schedule services with secure authentication and flexible booking options.

- Implemented authentication system using NextAuth with credential and OAuth providers.
- Developed booking system with availability scheduling, dynamic pricing, and confirmation flow.
- Built scalable frontend architecture using Next.js and TypeScript with clean UI using Tailwind CSS.

Technology: Next.js, TypeScript, NextAuth.js, MongoDB, Tailwind CSS

EXPERIENCE

Data Entry Specialist — Nation IT Limited

2024 – Present

Managed structured data pipelines ensuring accuracy, consistency, and timely delivery.

EDUCATION

BBA Accounting & Finance

2019 – 2023

City College Dhaka, Bangladesh

COURSE

Complete Web Development Course – Programming Hero

2025 – 2026

- 🌟 [View Certificate](#)
