CAREER OBJECTIVE

Full Stack Engineer with production experience building consumer mobile and web applications, backend automation systems, and multi-role platforms. Founder and CEO of NAVICORE — a Bangladesh-based technology venture builder. Currently developing RailMate Bangladesh (railmatebd.com), a live railway companion platform covering 130+ trains and 52+ stations, with a React Native app in private beta. Focused on building practical tools that solve real problems for everyday people in Bangladesh.

SKILLS

Languages: JavaScript, TypeScript, Python

Frontend & Mobile: React, Next.js, React Native, Expo Router, NativeWind, Zustand, HTML, CSS, Tailwind CSS, Shadcn, Daisy UI

Backend: Node.js, Express.js, Python (aiogram, Pyrogram)

Database: MongoDB, Supabase (PostgreSQL), Firebase, Prisma (learning)

Tools & Platforms: Git, GitHub, EAS (Expo Application Services), Vercel, Cloudflare, Stripe, Postman, NextAuth, VS Code, Docker (learning), AWS (learning)

AI & APIs: Anthropic Claude API, GitHub REST API, PostHog, Socket.IO, Cloudinary, Brevo

In Progress: RAG, LangChain, Vector Databases, CI/CD

PROJECTS

RailMate Bangladesh — Railway Companion Platform · **Live Product**

railmatebd.com | [GitHub](#)

Bangladesh's most trusted railway companion — real-time train schedules, community delay reports, and journey planning for 130+ trains across 52+ stations.

- Architected and built the full platform solo: Next.js 15 website (live), React Native mobile app (private beta), and separate backend API — all deployed on Vercel with Supabase as primary database and auth.
- Implemented bilingual (Bengali + English) i18n routing, SEO infrastructure with structured JSON-LD, sitemap, and Google Search Console integration.
- Built OTP-based authentication via Supabase, community reporting system, per-IP rate limiting, and production error handling across the full stack.
- Configured custom domain infrastructure on Cloudflare (railmatebd.com, api.railmatebd.com) with PostHog analytics and EAS build pipeline targeting Google Play.

Technology: Next.js 15, React Native, Expo Router, NativeWind, Zustand, Supabase, EAS, PostHog, Cloudflare, Resend, Zod

DevFolio Analyzer (AI-Powered Portfolio & GitHub Profile Analyzer)

[Preview](#) | [Client Code](#)

A full-stack analytics dashboard that evaluates GitHub profiles with a deterministic scoring engine and AI-powered insights via the Claude API.

- Built a structured scoring system to evaluate GitHub profiles with clear and consistent data flow.
- Integrated external APIs and ensured stable frontend-backend communication; resolved production issues including API mismatches, OAuth errors, and CORS handling.
- Ensured consistent API contract between frontend and backend, reducing data mismatches in production.

Technology: React 18, React Router, Recharts, Node.js, Express.js, MongoDB, JWT, Claude (Anthropic) API

LiveCollab — Real-Time Collaboration Platform

[Preview](#) | [Client Code](#)

A real-time collaboration platform with workspace management, role-based access, and live updates.

- Designed real-time event flow using Socket.IO to maintain consistent state across users; implemented role-based workspace system with controlled access and actions.
- Resolved synchronization issues between frontend state and backend events to improve reliability.

Technology: React, Node.js, Express.js, MongoDB, Socket.IO, JWT

Whisker Dairy — PetCare System

[Preview](#) | [Client Code](#)

A pet care management system that tracks health records, schedules reminders, and monitors pet expenses in one place.

- Built a health summary system classifying records as overdue, due today, or upcoming; implemented browser notification flow for vaccination, medication, and feeding schedules.
- Fixed timezone and data consistency issues to keep dashboard updates and reminders accurate.

Technology: React, Tailwind CSS, Node.js, Express.js, Supabase, REST API, Service Workers

EDUCATION

BBA Accounting & Finance

City College Dhaka, Bangladesh

2019 – 2023

COURSE

AI-Driven Software Engineering — Level 2 · Programming Hero April 2026 – Present

TypeScript, PostgreSQL, Prisma, Docker, AWS, RAG, LangChain, Vector DBs, CI/CD

Complete Web Development Course – Programming Hero 2025 – 2026

 [View Certificate](#)

EXPERIENCE

Founder, CEO & Chief Product Officer — NAVICORE June 2026 – Present

NAVICORE Foundation · Dhaka, Bangladesh · [navicore.co](#)

- Founded NAVICORE, a technology venture builder, and led end-to-end product development of RailMate Bangladesh — from architecture through live deployment — as the sole engineer.
- Managing Navicore Software division, delivering client web and automation projects that fund the consumer platform ecosystem.

Freelance Full Stack Developer 2025 – Present

Self-employed · Dhaka, Bangladesh

- Build and deliver backend automation bots and web applications for clients (paid, friend-referred).
- Scope, estimate, and independently ship projects end-to-end — from requirements through deployment.
